

► Overview

We are developing series of testing device and released omni-directional antenna. This 5G Omni-Directional Antenna covers both 28GHz and 39GHz.

► Feature

Can be used to measure wide band, standard antenna for 5G measuring system. Durable design and construction.

► Specification

Frequency (GHz)	24 GHz ~ 44 GHz
Impedance	50 Ω
V.S.W.R.	≤ 2.0
Polarization	Linear polarization
Radiation Pattern	All Horizontal Directions
Dimension	$\phi 16 \times H40$ mm (Not including connector)
Connector Type	2.92mmK/J (Standard)

■ Appearance

■ Typical Data VSWR($Z_0=50 \Omega$)
